### ABOUT ME

I am currently a Ceph Team Lead at Türk Telekom with over two years of experience in cloud platform operations. I have specialist knowledge in PostgreSQL and MongoDB cluster management with focus on high availability and performance optimization.

I developed PaaS Envanter, a React and Go based web application for inventory management and operational support. I also automated CI/CD pipelines to ensure end-to-end build and deployment processes.

I have expertise in OpenShift and Docker, as well as Linux system administration and DevOps best practices. I am interested in developing AI agents always researching advances in the field.

### EXPERIENCE

#### CLOUD PLATFORMS OPERATIONS SPECIALIST

Türk Telekom | December 2022 - Present | İstanbul, Türkiye

- OpenShift platform administration and operations
- PostgreSQL and MongoDB database administration.
- CI/CD process management using Jenkins and ArgoCD.
- Linux system administration, network configuration.

#### IT BUSINESS ASSISTANT

Halkbank | December 2021 - December 2022 | İstanbul, Türkiye

- I managed the solution processes by analyzing technical problems.
- I supported CAB processes for information systems infrastructure.

#### APPLICATION OPERATIONS SPECIALIST

Etiya | August 2021 - December 2021 | İstanbul, Türkiye

- I have performed database migrations and data updates in Türk Telekom broadband projects.
- I provided large scale database management with PL/SQL.

### TECHNICAL SKILLS

- Operating Systems:** Linux (Ubuntu, RHEL), Windows Server
- Container Orchestration:** OpenShift, Docker
- Storage:** Red Hat Ceph, IBM Ceph, Object Gateway S3
- Databases:** PostgreSQL, MongoDB (Cluster Management & Operations)
- CI/CD & Automation:** Jenkins, ArgoCD, Ansible, GitLab CI/CD
- Software & Development:** React, Go, Python (Model Training & AI Integration)
- AI:** NVIDIA CUDA, Ollama, OpenDataHub, OpenWebUI (Model Deployment & Fine-Tuning)
